

## MOUNT CARMEL R.C FIRST SCHOOL

07<sup>th</sup> Feb 2020.

Dear Parents/Carers,

To celebrate 'British Science Week' starting on the 6<sup>th</sup> March, we would like all the children to take part in a whole school interactive assembly on forces called Up, Up and Away, after which each class will receive a Mad Science in-class interactive workshop. These are aligned to STEM objectives, curriculum correlated and meet state and provincial requirements. With professional lesson plans, unique equipment, and animated instructors, Mad Science Workshops are an ideal way to reinforce core science concepts. Their hands-on approach, and focus on science and engineering practices will teach the children about the fun of science and will help to spark their imaginations!

Under the requirements of the Educational Reform Act 1988 we can only meet the cost of this activity by voluntary contributions. There is no obligation to contribute and children cannot be excluded because they have not made a contribution. However, this visit can only go ahead as arranged if we have sufficient support. To make this possible for the whole school we ask that each child makes a contribution of £4.75.

Many thanks

Mrs Burrows Science Coordinator.
