

## How to Support Home Learning

Encourage your child to keep a diary in English of what they do each day or week. How is life different now? What things do they like or dislike about it?

Get cooking! Ask your child to help with cooking and talk about what you're doing in your home language and English.

Go on a virtual school trip! You can enjoy zoos, nature parks, museums and historical sites, without leaving your home through the website <https://virtualschoolactivities.com/>. Talk about the things you see in your home language and English. Or make a list of words in your home language and ask your child to translate it after. Then they can write a report of their visit in English.

Organise a supervised online video call between your child and a friend or classmate via their parents. You could use Skype, WhatsApp or Facebook messenger. Encourage your child to write a list of questions to ask their friend or a list of things to talk about before it starts.
